

Internship Opportunity at MetroHealth Behavioral Health

The MetroHealth System, in partnership with Cleveland State University, have launched an internship opportunity that allows students to gain clinical exposure in a behavioral health inpatient hospital and outpatient setting. Enrolled students in the course will complete 9-12 hours of onsite work per week, across multiple locations throughout The MetroHealth System. Students will collaborate alongside teams of psychologists, behavioral health specialists, social workers, and counselors and will observe their interactions in clinical care.

This course is for one semester and is a non-paid internship. You will receive 3-4 course credit hours at CSU. Reliable transportation, COVID-19 vaccination, annual flu shot, drug screening, and background check are required (which can be completed on site at MetroHealth).

To apply, complete a PSY 391 Internship Application form at
